Heart, vascular & thyroid ultrasound	Included	Included
Exercise assessment	Exercise ECG and lung function	Cardiopulmonary exercise testing with ECG and lung function
Heart rate variability (HRV)	—	Included
Cardisio	Included	Included
Final consultation & report	Included	Included

If your Essential check-up identifies abnormal findings, further investigations may be indicated. Your treating doctor will discuss these with you individually.

Medically indicated physician services are generally eligible for private insurance reimbursement depending on your policy; the policy terms and insurer's decision apply. Statutory health insurance reimbursement is excluded.

The additional Professional whole-body MRI is separately billed as a self-pay service without envisaged private reimbursement. Several appointments may be required.
